a garret, todd

Good morning,

I represent an Italian traditional archer company born two years ago :

"Compagnia del Bernabò"(web site:

<http://compagniadelperbernabo.blogspot.it>) member of F.I.A.R.C., and I'm

write to you because the spirit of traditional and instinctive shooting is our spirit. We started archery 30 years ago when the instinctive shooting in Italy was strong and practiced. But from several years the most popular mentality is that it is impossible to shoot instinctively. We are also national traditional bow instructors, and we try to transmit instinctive shooting to others and new archers but it is very hard. As we practice bowhunter and bowfishing we try to teach archers the right way going hunter, setting bow and Arrows but it's hard too. We'd used many years ago your material and we loved it very much but now it's impossible to find in our country... Some time ago I find your web site and the Dr. Ed Ashby article publicised on your site; so I want to ask you help us to divulge traditional bow and bowhunting and I'd like to ask the permission to put your web link and some Dr. Ed Ashby article with the Italian translation on our blog.

Thanking you in advance for the assistance you'll be able to give us

yours faithfully
Alessandro Fodera

Alessandro,

Of course! Dr. Ashby hopes that his studies will travel around the world to help bowhunters everywhere. Share freely - translate - and warm regards to you!
